SUMMARY

I am a technology professional with nearly 4 years of software development experience. I'm looking to make a shift towards Product to assist clients in bringing their vision to life efficiently and effectively by presenting comprehensive solutions to meet their goals.

PROFESSIONAL SKILLS

- Clear and effective written and verbal communication
- Informed decision making
- Critical thinking
- Collaborative problem solving
- Personal and team organization
- Time management
- Leadership
- Prioritization
- Business analysis
- Agile methodologies
- Adaptability
- Troubleshooting

TECHNICAL SKILLS

- JavaScript, jQuery, Angular 4-7
- C#, .NET Framework, ASP.NET MVC
- Relational databases, SQL Server, SQL Server Management Studio (SSMS)
- Git, Github, GitLab, BitBucket
- JIRA, TFS (Team Foundation Server)
- New Relic, Kibana (ElasticSearch)

CAREER EXPERIENCE

naviHealth, Brentwood, TN

Software Engineer I / Product Owner / Technical Business Analyst
April 2019 - Present

- Act as a proxy for the users during development, and answer implementation and requirements questions from developers
- Collaborate and build relationships with stakeholders and end users to understand their pain points
- Gather business and technical requirements to translate into user stories
- Lead refinement sessions for the team to estimate effort of work for each item in the backlog
- Organize and prioritize the team's backlog
- Work closely with other Product Owners to understand the vision and direction of the products
- Main technologies and skills used: SQL in SSMS, New Relic, Kibana, C#, .NET, JavaScript, Angular 7, BitBucket, JIRA

Associate Software Developer / Technical Business Analyst
Jan. 2018 - March 2019

- **Key Achievement: In 2018, our team reduced our SLA ticket resolution time from 97 days to 34 days, a 64% decrease to remain compliant with SLAs**
- Research and triage reported issues, fix bugs, create documentation, and otherwise maintain code
- Assist with researching user experience and functionality improvements
- Work closely with Product Owner and Application Support team to understand the nature, scope, and severity of reported issues
- Perform business analysis by running queries on the data to evaluate impact and severity of reported issues

InfoWorks Inc., Nashville, TN

Software Engineer (contract)

June 2017 - Oct. 2017

- Collaborated on a project that dynamically generated tax service agreement contracts
- Implemented multiple features, average of 4-6 per sprint, to enhance user experience and implement new functionality
- Main technologies, and tools used: HTML, CSS, JavaScript, jQuery, C#, .NET, SQL, TFS, Visual Studio 2015, and SSMS.

Strategic Technology Solutions - State of TN, Nashville, TN

Complex Application Developer (contract)

Aug. 2016 - April 2017

- **Key Achievement: Successfully transferred ownership of 80+ internal and public-facing applications across 52 departments from the 3rd party vendor to the new in-house application team in 8 months**
- Facilitated conversations between development and each department to understand current application usage and future needs
- Focused on application maintenance, enhancements, deployments, and planning for future development

PROJECTS

Nashville Film Festival - Website Redesign

Nov. 2019 - Present

Website: <https://nashvillefilmfestival.org/>

Technologies: WordPress, Figma

Roles: Project/Product Manager, Web Developer, UX/UI Designer

Description: Nashville Film Festival wants their website redesigned to be more organized, easy to navigate, visually pleasing, and aligning with their values, mission, and overall branding.

"Junior Developer Toolbox" | Podcast

Sept. 2017 - Apr. 2019

<https://JuniorDeveloperToolbox.com>

Roles: Cohost, Content Creator, Producer, Social Media Manager

Description: Junior Developer Toolbox was a podcast about building, maintaining, and surviving a career in software engineering. We provided real talk from the trenches about everyday life as a junior developer.

NSS Cohort 12 Class Website

Apr. 2016 - June 2016

Github Repo:

<https://github.com/nss-day-cohort-12/nss12-class-website>

Live Website:

<https://nss-day-cohort-12.github.io/nss12-class-website/>

Technologies: HTML5, CSS3, JavaScript, jQuery, and Jekyll

Contributions: Initial repo and site setup, helped construct individual modals, group photo swap behavior, and overall project organization.

Description: I was team lead on the creation of our class website. I coordinated the project's parts to ensure each part was completed and merged with the whole project successfully and saw the project through from vision to completed product.
